**DETAILED ACTION**

***Response to Amendment***

1. Applicant's amendment filed on 3/23/09 has been entered.

Claims 1-13 are pending in the application.

Applicant's amendment filed on 3/23/09 has been entered.

In response to applicant's amendment and persuasive arguments, all the prior art rejection has been withdrawn.

***Response to Arguments***

2. Applicant's arguments filed on 3/23/09 have been fully considered and persuasive (see page 5 - 7, of the remarks filed on 3/23/09), with respect to the rejection of claims 1-13 under 102(e) rejection have been fully considered and are persuasive. Therefore, the rejection has been withdrawn and claims 1-13 are now allowed.

***Reasons For Allowance***

3. The following is an examiner's statement of reasons for allowance:

Claims 1-13 are allowed.

Applicant's arguments filed on 3/23/09 have been fully considered and persuasive (see page 5 - 7, of the remarks filed on 3/23/09). The prior art of record Matsumoto (US.6,965,690) discloses a system with a pattern projecting section 12 for projecting a pattern onto a target 10, where the target with the pattern projected is captured by light receiving sections 13 (FIG. 1). The Matsumoto system also includes a controlling section 14 and a processing section 15 that receives captured image data.

The Matsumoto system is directed to determining the rough shape of a target object by a silhouette method and determining the detailed shape of the object by a triangulation method. Matsumoto fails to disclose or suggest either a first and second shift of the pattern. The two shift patterns as recited in conjunction with the other features of claim 1 make it possible to simultaneously grasp the states of various parts of the object, for example the overall shape of the object as well as the state of motion of the object, including small motion such as the breath motion of a person. Indeed, Matsumoto is merely directed to determining the rough shape and detailed shape of an object by different methods, and is not particularly concerned with determining the motion of an object, as recited by claim 1, the prior art of record fails to teach either singularly or in combination, fails to anticipate or render the above limitations obvious.

4. Any comments considered necessary by applicant must be submitted on later than the payment of the issue fee and to avoid processing delays should preferably accompany the issue fee. Such submissions should be clearly labeled, comments on statement of reasons for allowance.
